

Model: MV-1000

Video *OnAir* (PC) Digital Wireless USB Camera

Introduction

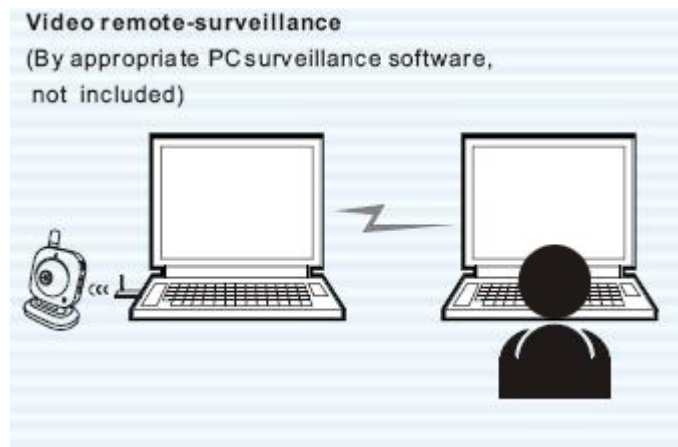

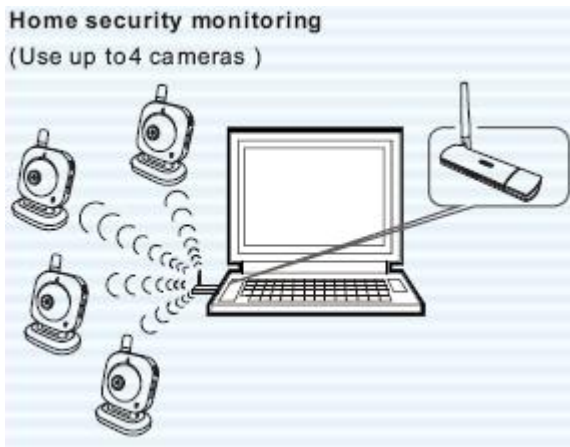

This new product uses the advanced digital wireless technology for video and audio transmission. It delivers higher quality than the conventional 2.4GHz analog transmission products.

Video OnAir (PC) is designed for application of: baby watch, elderly and disable people watch, burglar detection, employee fraud detection, home and office security monitoring. Digital wireless technology extend the ranges with crystal clear image from different locations.

Features:

- High reliability and noise immunity digital wireless technology.
- Digital wireless cameras send video to PC or laptop.
- Can monitor 4 cameras.
- Recording video in PC system.
- Remote surveillance is possible with PC surveillance software and broadband internet service.
- Audio transmission.

Functions:

Specifications:

Camera	
Frequency	2.4GHz
Antenna	Omni directional antenna
Modulation	FHSS
Camera	VGA CMOS camera
Night Vision	IR LEDs
Dimension	84mm*124mm*61mm
Power	DC 6V 800mA or 4AAA battery*4
USB Receiver	
Frequency	2.4GHz
Modulation	FHSS
USB output	USB1.1
Power	USB bus power
